

Smith & Wesson

1985
HANDGUNS

Celebrate the tradition of Smith & Wesson and the splendor of America

The struggle to settle this land was sometimes fierce — and Smith & Wesson was there, servicing the U.S. Cavalry and frontier scouts, famed lawmen and legendary figures like Jesse James, Texas Ranger L. H. McNelly, Cimmaron Beach and Sheriff D. A. Wells.

Today, it's the FBI (and virtually every other federal agency), 46 state police departments, and most of the largest municipalities in the Nation—accounting for over 80% of the approximately half million law enforcement officers carrying handguns. Add to this the uncounted sportsmen, collectors and target shooters, many of whom are world champions.

Only a superior product can command this kind of respect.

▲ Forging the Frame

◀ Smith & Wesson's modern facility in Springfield, Ma.

Smith & Wesson's popularity began with the patent of the first lever-action repeating pistol (predecessor to the repeating rifle) around the mid-1800's. But it was the exclusive patented cartridge revolver which saw action during the Civil War that established the Smith & Wesson name and our reputation for quality and dependability. Later came the development of our .38 and .44 double action revolvers and the .357 Magnum. Examples of engineering genius we continue to enjoy today.

Smith & Wesson has been at the forefront of the firearm field for well over 132 years, anticipating

the needs of lawmen and sportsmen alike.

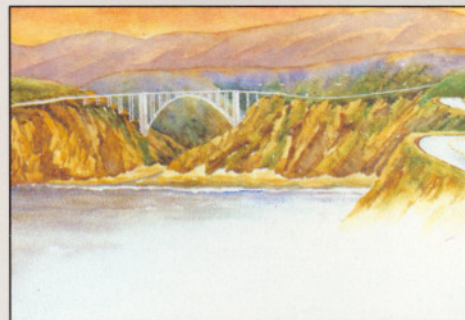

With this came our growth and the recognition as the leading handgun manufacturer in the free world. And while handgun specifications may change, our quality standards never do. We continue the reputation as "the thoroughbred of the handgun industry."

It's a position earned by insisting on premium materials, such as the highest grades of carbon and stainless steel available for frames, barrels and hammers, hot forged for maximum strength. And case-hardened

triggers that enhance durability and prolong use. Handsome stocks made of checkered walnut or imported Goncalo Alves.

Each handgun frame is polished by skilled artisans to provide a high quality surface; then hand fitted and tuned to assure a smooth working, reliable action. The type of action you unknowingly rely upon each time you fire your Smith & Wesson. Finally, every model undergoes multiple quality checks to insure years of trouble free performance.

The results are apparent. You'll see it in an expert shooter's well

known preference for our action. And in the tightly grouped target patterns that win national and international championships; most of which see more Smith & Wesson's than any other make of contending handguns.

The variety of frame sizes, calibers, barrel lengths, butt styles, finishes and sights we offer is unmatched by any manufacturer. And the caring doesn't stop when the gun leaves the plant. Our world-renowned Law Enforcement Academy and Armorer's School are testimony to the depth of our

commitment, with intensive training by noted instructors provided in our own facilities and in the field, both domestically and abroad.

Smith & Wesson provides over 40 warranty stations worldwide. A factory service center and our esteemed custom engraving executed to your unique specifications. It's quality backed by service. It's our guarantee to you that the Smith & Wesson "thoroughbred" you acquire today will still deserve your pride in decades to come.

That's the pride shared with building and owning the best.

CONTENTS

I've been eyeballing Gramp's Smith & Wesson for a long time, but Dad says a gun's a man-size responsibility. So's running a farm. I've learned plenty about farming and Dad says soon it'll be time for me to learn to shoot.

Sure hope my hands don't shake.

The responsibility of learning how to handle a gun can be a major step in the development of a youngster's confidence and sense of maturity. And such lessons, in passing along an American heritage, help cement that special bond between one generation and the next.

Our Model 34 1953 .22/.32 Kit Gun, ideal for the small hand or the novice target shooter, is a fine example of our line of J-frame double action revolvers — high-quality handguns short on bulk but long on performance and durability. While the J-frame's compact size, light weight, and dependable accuracy have found great favor among ranchers, farmers, outdoorsmen and shooting enthusiasts, this small frame's

easy concealability gained immediate popularity with law enforcement personnel when it was first introduced in 1950. It was appropriately called the .38 Chiefs Special. Subsequent models designed to satisfy the needs of law enforcement officers have kept the J-frame the primary choice of plainclothes and off-duty police officers to this day.

Models like the five shot stainless .38 Chiefs Special, the first stainless steel handgun which established Smith & Wesson as the leader in the stainless steel market. The .38 Bodyguard Airweight five-shot, features a protected hammer that won't snag on clothing (first developed as far back as 1887) and

weighs in at 14½ ounces. Or the .22 M.R.F. six-shot Target Kit Gun, (also available with an optional .22 LR auxiliary cylinder), with red ramp front sight and adjustable micrometer click rear sight — all with checkered walnut stocks monogrammed with the Smith & Wesson symbol of quality.

The J-frame double action revolver is available in a variety of calibers, barrel lengths, finishes, and stock and trigger styles to suit the particular requirements of your shooting needs.

Gramps says his Smith & Wesson's been controlling pests on this farm for over thirty years. The next thirty will be up to me.

SMALL FRAME REVOLVERS

B: Blue N: Nickel S: Stainless

Almost four million miles of highway in this country; about 175,000 of them right here in this state. That's a lot of responsibility riding on the shoulders of the highway patrol units.

But we're trained for it — and our Smith & Wesson lives up to it.

From New York to California, Smith & Wesson double action revolvers and pistols protect 92% of those four million miles of highway. A Smith & Wesson handgun is companion to many of the sharpest law officers in the nation; men and women who've proven their shooting ability both on duty and at respected world championship competitions. One word describes them: extraordinary. Just like the equipment they use.

Take the L-frame Smith & Wesson Model 686, the stainless steel version of our Model 586 .357 Distinguished Combat Magnum®. Known for its beefed-up cylinder wall, barrel throat and top strap, the L-frame was designed specifically to digest a steady diet of the powerful .357 Magnum round. The heavy-barreled L-frame with full length extractor shroud gives excellent balance for reduced recoil and recovery.

Or the K-frame Smith & Wesson Model 10. The classic .38 Military & Police introduced in 1899; has become a standard around the world for over 25 years. When weight is a primary consideration, our Model 12, .38 Military & Police Airweight fills the bill. And the Model 13, .357 Military and Police 3" Heavy Barrel remains the preference of the F.B.I.

It begins with time-honored design, detailed craftsmanship and unhurried assembly. It's the reason why 20 of the top 25 contenders for the prestigious 1984 NRA National Action Shooting Championship used Smith & Wesson handguns — including the first, second and third place winners. The shooter who established two new world records did it with a S&W. Over 70% of the 200 contestants relied on Smith & Wesson to maximize their chances in the main event.

And in the latest National Police Revolver Championships, an overwhelming 90% of the weapons used were Smith & Wesson. The numbers confirm what the competitive shooter feels...Smith & Wesson for consistent accuracy and reliability.

Small-game hunters can find the same kind of quality in our Model 48 K-22 Masterpiece M.R.F. (also available with an optional .22 LR auxiliary cylinder), which offers all the advantages needed for that well-placed shot. With our carefully appointed features, you're assured of maximum control... on a hunt, in competition, or on the job.

I'm proud of my job and confident in my abilities to carry it out. If someone needs help, I'm there and ready.

B: Blue N: Nickel S: Stainless

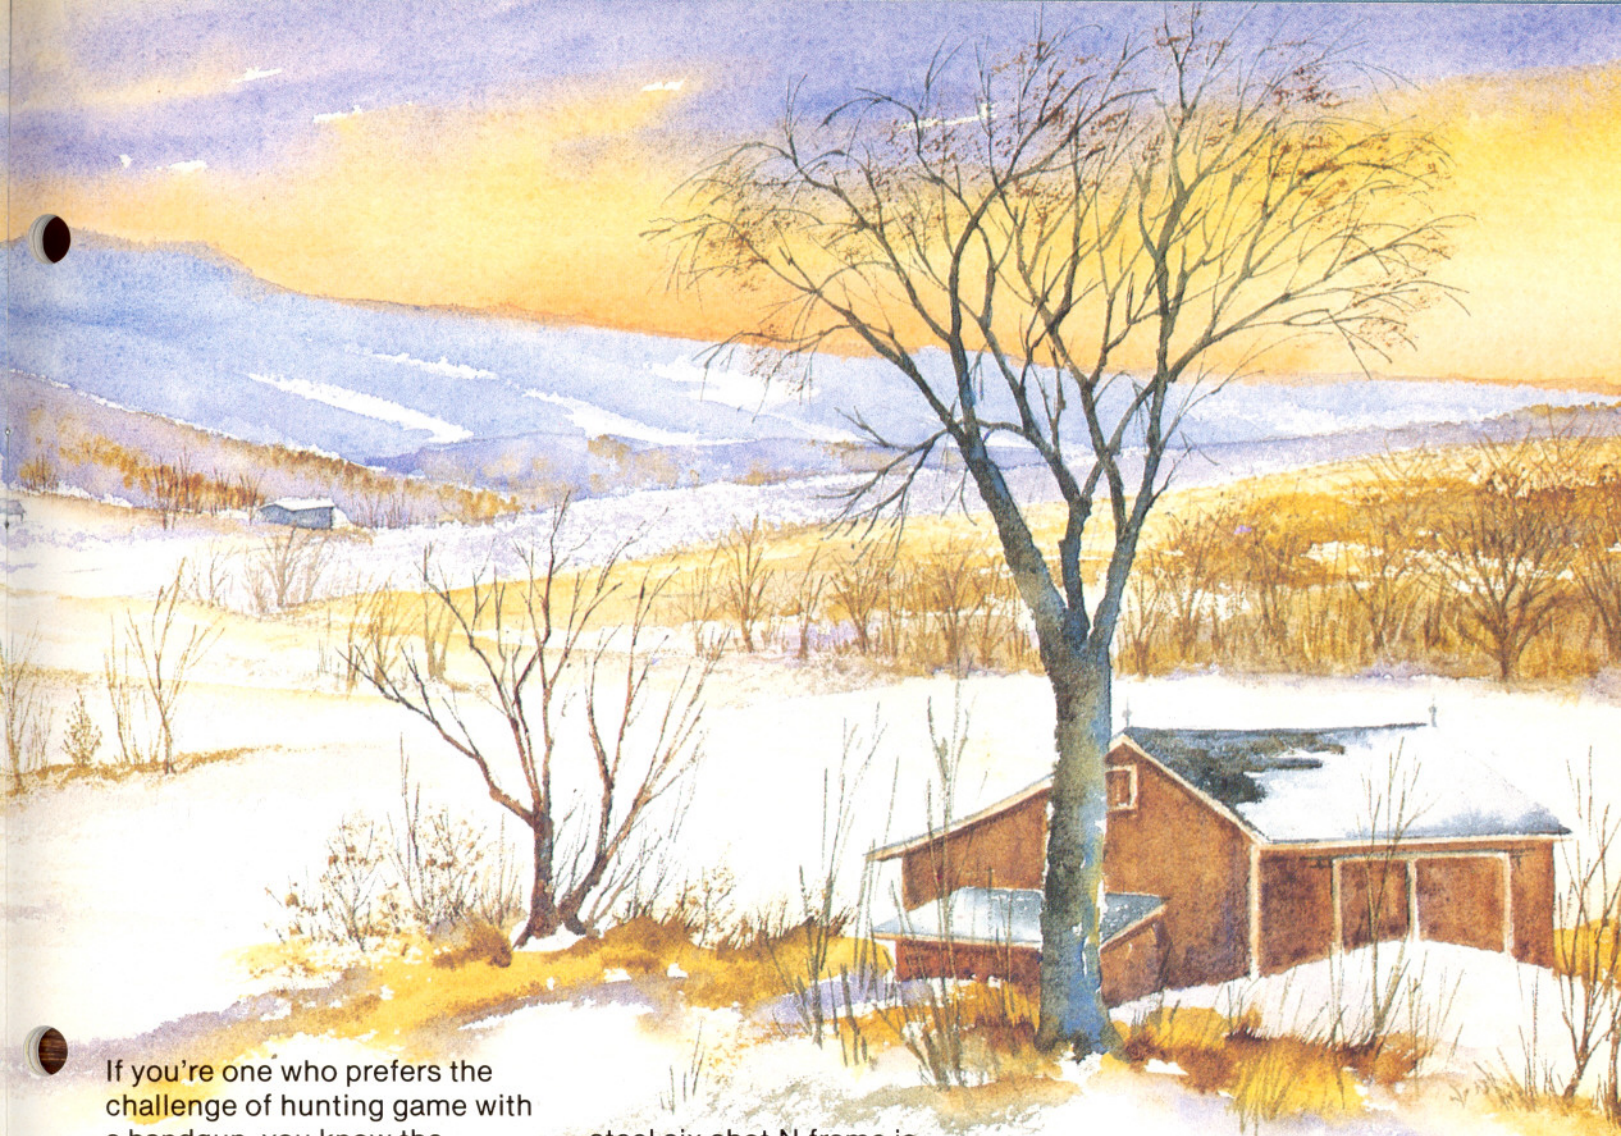

She'd been covering my backtrail, circling and dodging, testing my intelligence. Sometimes I thought she'd stumped me. But suddenly there she was, tail stiffly to one side, proving my hunch was right: a buck was at hand, the doe wasn't alone...

Maybe 60 yards. And a whitetail capable of running 30 mph.

I wouldn't try it without a Smith & Wesson.

If you're one who prefers the challenge of hunting game with a handgun, you know the importance of judging the territory, studying your game's behavior, reading its signs. You know the obstacles you invite. And the sharp skills you must hone to succeed.

But you also know the benefits. Hunters agree it's far easier and faster to attempt a second shot. And a handgun is much more compact for tracking through brushy forest or retrieving your game.

The Smith & Wesson .44 Magnum is well known to be first rate in strength and accuracy for this demanding type of hunting. Available with a 4", 6" or 8 $\frac{3}{4}$ " barrel, the Model 29 in carbon steel or the 629 stainless

steel six-shot N-frame is designed for today's powerful handgun ammunition.

And for the metallic silhouette shooter, the Model 29 Silhouette with a 10 $\frac{1}{2}$ " barrel comes equipped with a four-position front sight. This feature, allows for a quick change of elevation without altering the fully adjustable rear sight and gives you the extra barrel length (10 $\frac{1}{2}$ ") for greater sight radius at ranges up to 200 yards.

Another sturdy six-shot double action revolver designed to absorb the energy of high-velocity hunting loads, the Model 27 .357 Magnum has been a favorite of handgunners since first presented to J. Edgar

Hoover in 1935. The oldest N-frame Magnum still in production by Smith & Wesson, this prestigious model is surrounded by tradition and history and is still unequivocally recognized as the finest .357 Magnum in the world.

For those who like a heavier hunting load, there's our Model 57 .41 Magnum or the Model 25 .45 Long Colt six-shot revolvers, featuring all the quality features found in our entire line of handguns.

Just as important as knowing how to read the tilt of a doe's tail is knowing you're ready with the right gun. For my money, that's a Smith & Wesson.

NOTE: Refer to page 24 for Handgun Accessories Chart for Large Frame Revolvers.

When I made the force, I probably spent as much time on uniform and equipment as I did on the firing range. Appearance counts when you want the public to know that you can be relied upon.

But performance counts more.

That's why our department issues Smith & Wesson.

All across the country, at the state and local level, more departments issue and rely upon Smith & Wesson handguns than any other make. In fact, over 80% of the domestic market alone. And many thousands of these officers rely on the speed, firepower and incredible reliability of our 9mm semiautomatic pistols. States like Illinois; cities like metro Las Vegas to mention a few of the 65 departments carrying Smith & Wesson semiautomatic pistols.

You can attribute this to the proven performance of the Smith & Wesson 9mm. And of our features like the double action capability, serrated ramp front sight, three different safety mechanisms (including an optional ambidextrous manual safety for left hand shooters), and magazine capacities up to 20 rounds. Add to this, three

distinctive styles with a fixed or adjustable rear sight and the availability of stainless steel or high tensil strength aluminum alloy frame construction.

Smith & Wesson's newest 9mm semiautomatic pistol the Model 469, provides all the sought after features you'd expect from a 9mm and a few more. This compact sized pistol features a fixed barrel bushing for greater accuracy; recurved trigger guard for a two hand hold; spurless hammer for less snagging; a beveled magazine well for quick reloading, an amazingly compact size and light weight (only 26 ounces with magazine) for better concealability; and the capacity for twelve rounds (or twenty rounds with an optional magazine). The model 469 is the only factory produced high capacity 9mm that is suitable for both duty and off-duty use.

All of our autoloaders have three independently operated safeties: manual hammer block, magazine disconnect (the gun won't fire without a magazine inserted), and the internal firing pin lock requiring total trigger compression for the action to operate.

On the competitive field, shooters rely upon the accuracy of Smith & Wesson automatic target pistols. Some notable competitions like the National Pistol Championship and the International Centerfire Duel see more Smith & Wesson model 41's and 52's than any other single make. Shooters rely upon the proven out-of-the-box accuracy of these models to maximize their chances and compliment their skills.

The highways around Chicago are among the nation's busiest. And every day I am a part of what helps keep it moving.

History is still being made.

In the spring of 1984, Smith & Wesson again involved itself in a historical event — the 1984 Olympics. To introduce our first .45 caliber automatic pistol (the new Model 645 Stainless Steel), we handsomely engraved a preproduction working model; opened official auction bids; and donated the entire proceeds to the International Shooter Development Fund to help support the U.S. Shooting Team in the Olympics. Featuring detailed engraving inlaid with 18K and 24K gold, this remarkable commemorative piece brought a winning bid of \$67,000 for the Fund.

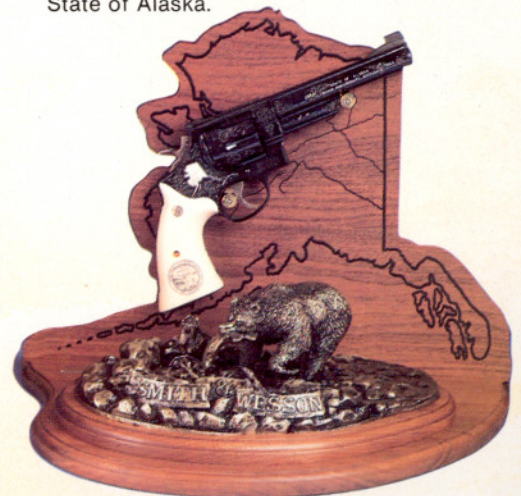

The 1800's.
Collectors of fine

handguns look back upon that period in our land's growth with nostalgia. And Smith & Wesson was an integral part of that growth, helping to shape history. It was a time when one's handgun was a natural, vital item of apparel, usually personalized (however crudely) in some permanent form. Perhaps recording a legend through descriptive engraving.

Smith & Wesson is as proud of this contribution as we are the debut of our new Model 645 pistol (scheduled to become available in 1985).

Like the Olympics, Smith & Wesson is steeped in tradition for well over a century. Committed to

Specially designed and produced to commemorate the 25th Anniversary of the State of Alaska.

ENGRAVING

excellence. Founded by men of pioneering spirit whose early contributions to society are still benefiting the public today. And the tradition continues, with donations to such worthy contemporary recipients as the Olympic Shooting Team and U.S. Biathlon Association approaching a quarter of a million dollars. And with the commemorative pistol immortalizing the spirit of the '84 Olympics, history is recorded again — keeping Smith & Wesson a legend in *our* time.

Personalized Engraving adds that distinctive, personal look to your Smith & Wesson handgun. Smith & Wesson skilled engravers can custom design a work of art to embellish your handgun, using your personal guidelines. Virtually any type of custom design can be created;

from monogrammed initials and emblems to scenes depicting unforgettable experiences. Profuse inlaying with silver, gold, platinum or precious gems can be provided. Quotations are available upon request.

A distinctive new style of engraving has been created for 1985 and is available on either newly ordered or currently owned handguns. Pattern "85" features delicate scroll engraving by our skilled artisans and can be ordered in three coverage classifications (A, B, or C). Consult your dealers for details.

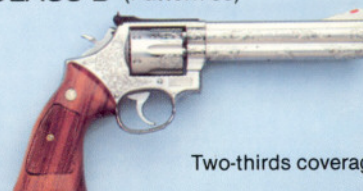

Side Plate Engraving — initials name and or dates are beautifully machined engraved and filled with 20 kt gold. Gold filling will withstand rebluing. Consult your dealer for details.

CLASS A (Pattern 85)

Maximum coverage over the entire gun (sideplates, barrel, cylinder)

CLASS B (Pattern 85)

Two-thirds coverage

CLASS C (Pattern 85)

One-third coverage

Side Plate Engraving

ACCESSORIES

Smith & Wesson offers an assortment of accessories as well as factory installed options that will enable you to customize a handgun to your specific needs. All handgun accessories and service parts are available on a world wide basis through Smith & Wesson Dealers or Distributors or may be ordered directly from the factory should you be unable to locate them in your area.

How to Order Parts

Parts orders should be forwarded by mail directly to:
Smith & Wesson Parts Department
2100 Roosevelt Ave.
Springfield, Ma. 01101.
Telephone orders will be accepted with a limit of (5) items per order by calling (413-781-8300) extensions 213 or 214. Collect calls will not be accepted.

Shipping & Payment

Smith & Wesson will not ship parts C.O.D. We will accept MasterCard, Visa, Personal Checks or Money Orders. No cash please. Merchandise will be sent via U.P.S. within ten working days upon receipt of order.

Target & Combat Stocks

Target stock positions the hand lower on the gun to provide a more precise alignment of the trigger finger to the trigger, while also allowing a straight back and down hammer pull in single action fire. Available in checkered walnut or imported Goncalo Alves in a checkered or smooth finish with speed loading recess.

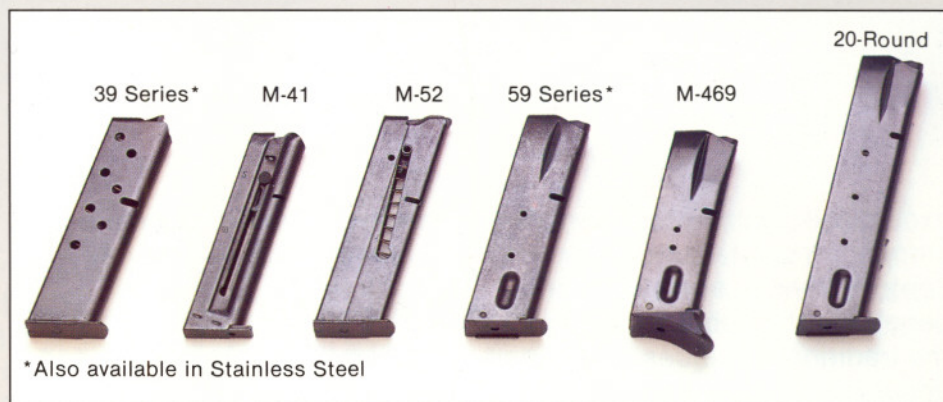

Combat stocks provide a sure grip with deep finger grooves and are available with a special "speed loading" recess. Available in Goncalo Alves.

Model 41 Pistol Field Barrel

Five inch barrel easily converts your Model 41 target pistol into a handy compact pistol ideal for field use. Features include: fully adjustable micrometer click rear sight, and a Smith and Wesson blue finish. Available with a red ramp front sight or a patridge undercut front sight. Barrel weight is 12³/₄ ounces.

Magazines

Standard capacity blue magazines can be ordered for the S&W 9mm and Target Pistols. Extended capacity (20-round) magazines are also available for Models 59, 459, 469, 559 and 659 9mms. All Smith & Wesson magazines are produced to our exacting product specifications.

Presentation Cases

Two solid mahogany cases with a blue velour interior are available from Smith & Wesson. Order No.'s 4813, 4814, 4815, 4866 have a fitted interior and will accommodate S&W "N" Frame revolvers in barrel lengths of 4", 6", 8", 10 1/2" respectively. Order No.'s 4867, 4868, 4869, 4870 have a universal interior and accommodates any handgun with up to a 10 inch barrel length.

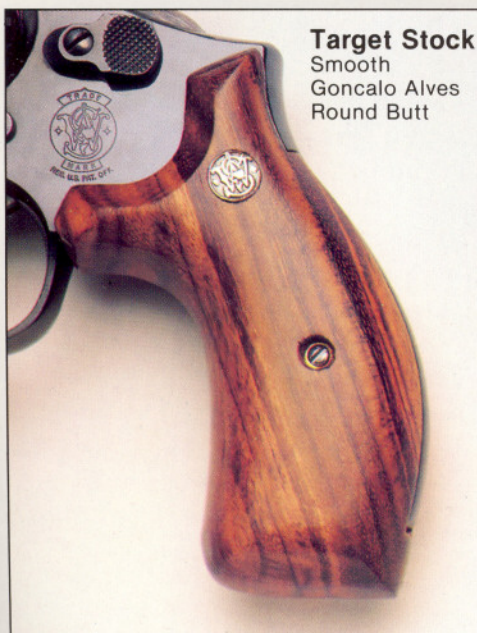

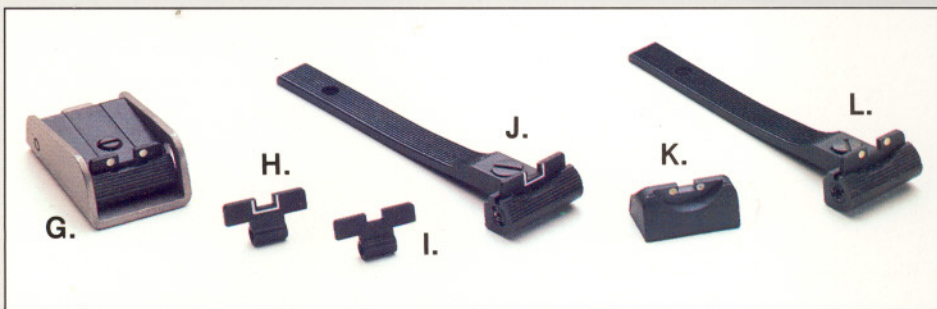

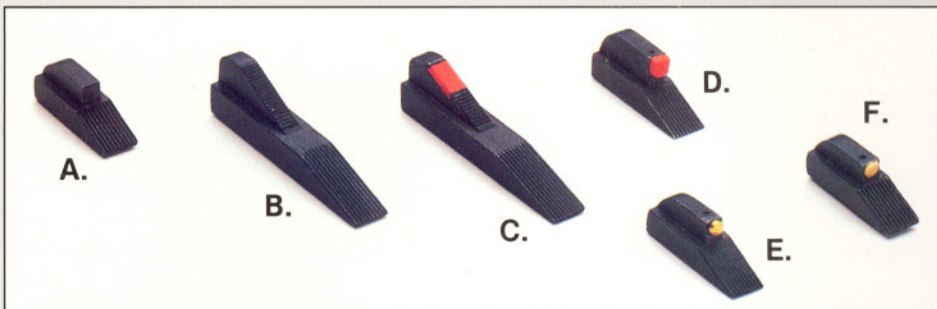

Target Sights

Accessory front sights are available for Smith & Wesson K, L, or N frame target models (adjustable sights) with a full length barrel rib.

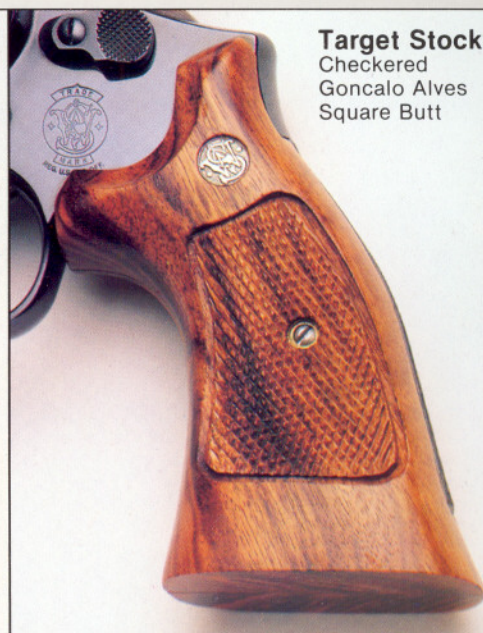

- A. Patridge blade on ramp base (or blade only)
- B. Baughman Quick Draw blade on ramp base (or blade only)
- C. S&W red or yellow ramp blade
- D. S&W red or yellow post blade
- E. McGivern gold bead on Patridge blade
- F. Call gold bead on Patridge blade

Rear Sights

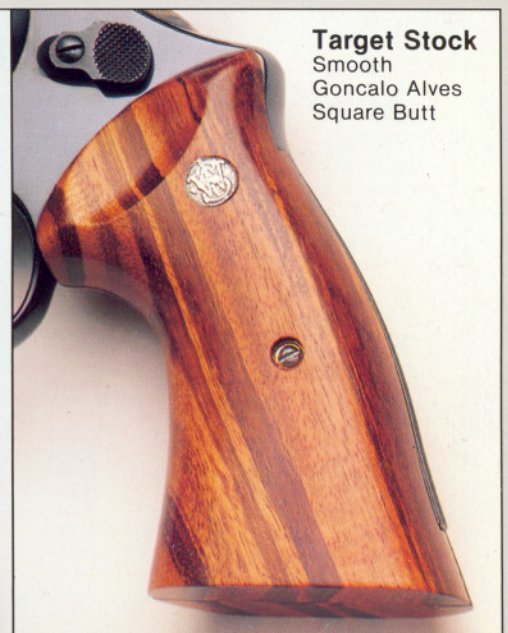

- The following rear sights are available as separate accessory items or for factory installation on K, L, or N frame target (adjustable sight) revolvers and pistols.
- G. 9mm semiautomatic pistol adjustable rear sight, R.T. dots
 - H. White outline rear sight slide
 - I. Rear sight slide
 - J. S&W Micrometer Click rear sight assembly with white outline or plain rear sight slide
 - K. 9mm semiautomatic pistol fixed sight, R.T. dots
 - L. Revolver rear sight assembly, R.T. dots

Smith & Wesson has commissioned the well known landscape artist — Stanley Maltzman of Freehold, New York to recreate through watercolor the splendor of the American outdoors. Stan, listed in *Who's Who in American Art* and other notable publications, has been the recipient of numerous awards and his works, a part of many corporate and private collections.
